## Definition

The **n-th partial sum** for a sequence  $\{a_i\}_{i=1}^{\infty}$  is

$$S_n = \sum_{i=1}^n a_i = a_1 + a_2 + a_3 + \dots + a_n$$

## Definition

## A Series

$$\sum_{i=1}^{\infty} a_i = \lim_{n \rightarrow \infty} S_n$$

## Theorem

If  $\lim_{n \rightarrow \infty} a_i \neq 0$  or does not exist, then  $\sum_{i=1}^{\infty} a_i$  diverges.
