Joining a windows (vista, 7) computer to the Campus Domain

Go to BeachID and change your password (if you need to).
After successfully connecting to the secure **wired** network (not beachboard), use Control Panel-System and Maintenance-System to do the following:

1. Under **Computer name, domain, and workgroup settings**, click **Change settings**.

2. From the **System Properties** dialog box, click **Change**.

3. In the **Computer Name Changes** dialog box, type the computer name in **Computer name**. Click **Domain** and type the Active Directory domain name. (campus-domain)

4. Click **OK**.

5. When prompted, type your domain name and password to join the computer to the domain. (your user ID & password.)

6. Restart the computer when prompted.

When computer is restarted, it automatically authenticates to the wired network using the computer's domain account credentials or certificate.
