

If you are an 18 or older math major you can earn \$25!

We are looking for math majors who can help us out with our project, *Validating Measures of Quality Instruction* (VMQI).

Participation is strictly confidential and requires less than one hour of your time; it includes answering 34 items about situations in college algebra and providing additional information about your experiences as a math student.

You will receive \$25 within 3 weeks of completing the survey.

To determine eligibility, please click the following link [VMQI STUDENT FORM](#). This form requests specific background information and sends you a personal link to the survey if you are eligible to be part of our study.
